

INTRODUCING The PUNKBed

Allow us to introduce the new gold standard for hostel beds! We call it **The PUNKBed** (a callback to our more than decade-old slogan "bunk's not dead!") and it's been made **by travellers, for travellers.**

Every nook and cranny of this beauty has been tried and tested to the fullest extent. The results are a sleek, easy to assemble, stable and - most of all - user-friendly bed that is guaranteed to bring bunking to the next level.

What makes **The PUNKBed** so special? We're glad you asked!

MAXIMUM SECURITY

All our dorms come with easy-to-use lockers designed to fit the largest standardised luggage sizes. Each guest also has access to their own personal, code-protected **storage box** at the foot of each bed.

This box comes with **two power outlets** and enough space to safely lock and charge your valuables/electronics. The best part? A **universal adapter** is already built-in, meaning all of our guests, no matter where from, can seamlessly plug in, lock the box and go to sleep!

MAXIMUM PRIVACY

Blackout curtains with a special "**silent glide**" rail ensure you'll get some decent shut-eye, no matter how crazy things got in the bar last night.

MAXIMUM COMFORT

Alongside the comfy mattresses and bedside lamps (equipped with an additional **USB port** and phone holder), one feature we think our guests will love most is the built-in, individually controllable **electric fan** that guarantees a great sleep, even during the hottest summer nights.
